Applicant's election with traverse of the invention of Group I, claims 1-12, in the reply filed on 3/14/06 is acknowledged. The traversal is on the ground(s) that the product claims require the same method of production as required by the method claims. This is not found persuasive because claims 13-20 although written in product-by-process form are drawn to the product nonetheless. As stated in the requirement for restriction mailed 2/10/06, the product can be made by a process that does not involve thinning a deposited polysilicon layer because such a layer could have been formed by a process including etching to thin the polysilicon layer.

The requirement is still deemed proper and is therefore made FINAL.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2,4,6,8,10 and 12 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 1 and 7 have been amended to require the polysilicon and the oxide liner to extend over the surface as recited in claims 2,4,8 and 10. The polysilicon inherently would be able to survive and oxidation process that only oxidizes a layer of the surface of the polysilicon.

Claims 1-4,6-8,10 and 12 are rejected under 35 U.S.C. 102(a) as being anticipated by Ito et al 6624044.

See figures 18b-18f.

Claims 1-4,6-8,10 and 12 are rejected under 35 U.S.C. 102(b) as being anticipated by Muller et al 5776808.

See figures 2e-2h.

Claims 5 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance: Although Razouk et al 5581110 and 5911109 and Park 2004/0018676 disclose capping a polysilicon filled trench with a nitride layer the polysilicon in the trench is not patterned in the manner disclosed by Muller et al and Ito et al and would therefor not be applicable to those processes in part because of exposed polysilicon on the sides of the protruding portion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
